

Life Systems, Inc.

Endoscope Repair: Flexible, Rigid, Camera Heads, Power, Transducers • **Refurbished Endoscopy Equipment:** GI and Surgical
• **ERBE Surgical Systems:** Electrosurgery, Helix Hydro-Jet™ •

Times change and so does equipment.

Life Systems, Inc. is fully aware of this fact and is ready to serve your equipment repair needs ... *even on the new Olympus 180 series equipment.*

For several months, our skilled engineering staff has had access to Olympus 180 series adult and pediatric scopes. Through meticulous research and the Part-to-CAD process, Life Systems has engineered replacement parts for the 180 Series scopes.

We have performed due diligence on the final manufactured part design. Our validated manufacturing partners' production process holds the specification, tolerance and finish of the original parts.

Experiencing the additional scope benefits by upgrading to the 180 series does not mean you only have one source for repair and maintenance. Our repair technicians have been working hand-in-hand with our engineering group to familiarize themselves with system components of the 180 series and document the proper repair procedures.

Life Systems has the parts and repair know-how to service your 180 series equipment. Your investment in new equipment is considerable; partner with a company with the parts, expertise and commitment to protect it.

New Series? No Problem!

Design / Engineering

- Computer controlled metrology using the latest 3-D laser scanning equipment, measuring microscopes, and CAD software.

Consistent Results

- Precision manufacturing partners utilizing techniques that yield accuracy to within 1/10,000th of an inch.

Engineering Capital

- Our staff has long-term experience working in quality-controlled, manufacturing environments.

Documented Quality Control Process

- All replacement parts are subject to the same rigorous standards employed in our repair process. Finished repair parts are compared to computer generated templates for accuracy and consistency.

Response Time

- New generations of equipment require new repair parts. No one develops repair parts to meet this challenge faster than Life Systems.
