FOR IMMEDIATE RELEASE:

Life Systems, Inc. Has Moved into New Headquarters and Manufacturing Repair Center

Chesterfield, MO – April 20, 2006 – Life Systems, Inc. recently moved into a new corporate headquarters and expanded manufacturing and repair center in Chesterfield, Missouri. This cutting-edge facility confirms the company's commitment to advancing technology in rigid and flexible endoscope repair and refurbishment, providing first-class service and support, and advancing equipment training for medical personnel.

Located at 515 Trade Center Boulevard, Chesterfield, Missouri, this 15,000ft² building is divided into four main areas – corporate offices, manufacturing and repair, inventory warehouse and a 35-seat technical education center.

“The new building represents a significant investment by Life Systems, Inc. and re-affirms our dedication to quality manufacturing and repair services for endoscopic equipment,” said Jeffrey Lay, Vice President of Business Development.

“We are growing to better serve our customers. The additional integration of an educational training center also provides a convenient location for nurses, physicians, technicians, biomedical engineers, administrators and material managers to further their knowledge of the industry.”

This new building enables Life Systems, Inc. to build on its current reputation as a leader in the field of endoscopic repair and service. According to Lay, the new Life Systems' facility was designed to facilitate and encourage a cooperative style of working with medical staff and users to prevent avoidable repairs. We work with many health organizations – including several in metro St. Louis – and encourage visitors. This new space will allow the business to expand its product lines, expand inventory, add new products as well as hold on-site training seminars.

The facility was designed by David W. Dial Architects and Keystone Construction Co. served as the general contractor for the build.

About Life Systems, Inc.

Founded in 1992, Life Systems, Inc., is a leading endoscope repair company and the Midwest's largest provider of high quality, reconditioned endoscopy equipment. Since then, the company has brought its repair and service expertise to medical customers including surgery departments and gastrointestinal labs of numerous hospitals and surgery centers.

Currently headquartered in Chesterfield, Missouri, Life Systems is also a key distributor of **ERBE** surgical systems in nine Midwestern states.

The evolution of Life Systems has brought about many changes, however our business philosophy has remained the same: to provide exceptional value and service while continually searching for innovative ways to reduce equipment and repair expenditures.
